Don't let the "MoneyWiz" name fool you. ⍰ A simple calculator, to use the name's alliteration, is just what you need. It is easy to use and has powerful features to make money easier. The program is supported on Windows 95/98/NT/2000/XP, Vista and 7. It is FREEWARE and its authors guarantee both no cost and no end user support. Its simple, practical design is assisted by the program's user-friendly interface and smooth navigation. There are buttons and toolbars for the most common calculations like summing, subtraction, multiplication and division, but the program's interface remains clean and uncluttered, which allows the user to concentrate on other activities. The program is ideally suited for those who need a simple but effective money calculator. It lets you generate a variety of reports for invoices, bank transfers, credit card payments, expense, payable and owed. Some of its features include: * Reports of total and average balances * Reports of paid and unpaid invoices * Reports of total and average due amounts for each account * Reports of the balance of all accounts * Reports of credit card balances * Reports of average total amount per transaction for each card * Reports of total number of payments, loans and cashier's checks * Reports of the balance for each account category, and the average balance for each account * Reports of the balance of all account categories * Reports of current balance for each account category * Reports of outstanding invoices * Reports of outstanding payments * Reports of outstanding accounts receivable * Reports of delinquent accounts receivable * Reports of average unpaid and total balance per account * Reports of unpaid and paid invoices * Reports of the sum of unpaid amounts from the last 3 months and the sum of all unpaid invoices * Reports of unpaid and paid invoices * Reports of all accounts receivable by date * Reports of all accounts paid by date * Reports of all accounts receivable and paid by date * Reports of all accounts unpaid by date and paid * Reports of overdue invoices by date and total amount * Reports of all overdue invoices * Reports of invoice totals and average per transaction * Reports of the balance for each account per month and the total balance for all accounts * Reports of the amount paid, due or unpaid for each account per month and the total paid for

MoneyWiz is a simple and easy-to-use application that seeks to help users make the most of their finances. MoneyWiz is a no-nonsense budget planner designed to help you keep track of your expenses and receipts and thus make smart, balanced and informed decisions. What’s more, it does so in a way that makes it very easy to understand everything you need to know to take control of your finances. The application features an easy-to-use calendar and reminder system, a project manager to keep track of your major expenses, an address book, a To Do list and much more. It also allows you to select different categories of spending, as well as to create the usual: To Do, Meals and Entertainment, Shopping, Home Improvement, Medical expenses, etc. MoneyWiz lets you adjust the date-range of the categories you want to include in the application and the one you want to exclude, as well as the type of data you want to keep. MoneyWiz features a robust search system with which you can locate any item of your spending from your account summaries, and it enables you to enter dates, either in the ordinary way or as a specific date, event, time, etc. As you enter data, the application generates a report to help you understand your spending and how much you’re spending in each category. You can also easily export the report in various formats to send it to your accountant if you so wish. The application also comes with some extra features such as a graphical report, a livegraph that shows you in real-time the level of income and expenditure in each category, an item details table and the option to export your entries to Excel. MoneyWiz also lets you create sub-categories, as well as to set the minimum and maximum spending limits for each item. You can also specify a date range, select the type of activity, and automatically open a new application window. Keep Control is a useful and easy-to-use application that aims to provide assistance to users by reducing repetitive task. The application’s

main window is divided into two sections: the one on the left displays a list of activities you can configure, while the one on the right enables you to perform the selected function. Both sections feature toolbar-style controls and the items in the former are directly linked to those in the latter. It is very simple and intuitive. You can add or remove tasks from both sections and
