Recommended browser: Chrome . Backup and recovery software programs must verify that all necessary components for a backup are installed on your system before the first backup is initiated. Take a look at these essential sections of the PDF to be sure you have everything you need to make a back-up. Category: software licenses Category: audio engineering softwareQ: 1px line height with pre tag I am working on the art piece shown below: I would like to have a 1px line between the "dumbbells" and the words. The issue is the the line height isn't working because I'm using a pre tag for the text. I tried making a box with 1px of height and width and using a negative margin on the pre tag but it doesn't work either. Here's what I did: .content-wrapper { height: 100%; position: absolute; margin: 0px auto; overflow: hidden; width: 100%; } .content-wrapper pre { height: 1px; width: 100%; padding: 0px; margin: 0px; position: relative; font-size: 20px; line-height: 24px; -webkit-box-sizing: border-box; -moz-box-sizing: border-box; box-sizing: border-box; overflow: hidden; } This is a test I also have a fiddle here that uses an image. A: If you really need a single line

A: I think Dolby Media Meter 2 is included in the Dolby Digital Professional Package that is included in the Creative Suite 3/CS4 DVD. The Creative Suite 3/CS4 (as well as the Ultimate Suite 4) retail for ~\$700 and includes a preinstalled copy of the Dolby Digital Professional Package which includes Dolby Media Meter 2 among other goodies.

USS Osprey (AM-350)
USS Osprey (AM-350/MSO-350) was an built for the United States Navy during World War II. In service from 1945 to 1947, the ship was a, and later an, assigned to escort and patrol duties, and she was the first U.S. Navy ship to carry the name. She was decommissioned in 1947 and transferred to the Soviet Union as AM-350. Her Soviet service was interrupted by the German invasion of the Soviet Union in 1941, and resumed when the Soviet Union declared war against Germany in August 1941. She was struck from the naval register in 1956.

U.S. Navy service
The second U.S. Navy ship to be named Osprey, AM-350 was laid down under a Maritime Commission contract (MC hull 1601) on 14 June 1942 at Sturgeon Bay, Wisconsin, by the American Shipbuilding Co.; launched on 26 November 1942; sponsored by Mrs. T. G. Orr; and commissioned on 27 June 1943, Lt. R. H. Worden, USNR, in command.

U.S. Navy in World War II
Following shakedown and training operations out of New London, Connecticut, the new destroyer joined the Atlantic Fleet and, on 22 October 1943, sailed to Arramanches, France, as a unit of the 16th Fleet. Arriving there on 7 November 1943, she continued local operations until the end of 1943. Departing Arramanches on 5 January 1944, Osprey stood out of Plymouth, England, to escort the first of three Liberty ship convoys to Murmansk, Russia, the destination of a cargo of war materials destined for the Soviet Union. She departed Mur 2d92ce491b
