Q: How to upgrade nuget to 3.4.4 I upgraded nuget to 3.4.4 on visual studio 2017 community edition and after i ran nuget restore my project says NuGet v3.4.4 was not found on this machine. -Install NuGet package(s) for package restore Can anyone please help me to fix this issue. A: The reason why you cannot install it is you installed 3.4.4, but you want to install 3.5.0. After that, you need to uninstall nuget and do a clean install of it, so the new one can take effect. You can find the uninstall process of it in the visual studio or vs community. This invention relates to a folding chair, and in particular to a folding chair having a seat member and backrests in a configuration to maximize the amount of floor space required for storage thereof when the chair is not in use. An example of a prior art folding chair of this type is shown in U.S. Pat. No. 5,964,444 issued to the present inventor. In this patent, the seat and backrests fold or collapse in a direction generally parallel to the floor, i.e., parallel to the direction in which the chair is placed in storage. As a result, only the cross-sectional dimensions of the chair, i.e., the height and width of the chair, are reduced, thereby causing the chair to occupy less floor space in its folded storage configuration. However, the space required for storing the chair in the folded storage configuration is still relatively large, since the length of the collapsed seat and backrests is substantial. The present invention relates to an improved folding chair which overcomes the drawbacks of prior art folding chairs. In particular, the folding chair of the present invention is arranged such that the length of the collapsed seat and backrests is substantially decreased, thereby providing a folded storage configuration which requires less space to store than prior art folding chairs of this type. In accordance with the invention, there is provided a folding chair which comprises a seat member; a backrest pivotally connected to the seat member, the backrest having a first end and a second end; a first handle mechanism for folding the backrest about the first end thereof; a second handle mechanism for folding the backrest about the second end thereof; and
