Deutschland kürzlich eintragen Tetris is a video game that involves dropping down rectangular shapes into empty rows to fill them. Tetris is a game where the player is challenged to match falling tiles of different colors and shapes. To win, a player must fit at least four of the same color or shape together at the bottom of the screen. Tetris is a puzzle video game developed by the video game company Nintendo. It was originally released for the Nintendo Entertainment System (NES) in Japan on October 5, 1985. The NES version sold 30 million copies, making it one of the most popular video games for the Nintendo Entertainment System. An original version of Tetris was developed in 1974 by Alexey Pajitnov, a Russian computer programmer, for the computer game Elektron, which would later be made into Tetris. In 1989, Tetris was released on the NES in Japan, credited as being developed by Makoto Banno, Hiroshi Yamauchi, and Nintendo; this version later became the first international version. It was licensed in other countries in 1991. Tetris is one of the most popular video games of all time and has been included on various best-of lists. Despite being designed for a video game console, Tetris has been ported to numerous game systems, including the Atari 2600, Amiga, Apple II, Game Boy, IBM PC, MS-DOS, Sega Genesis, Sega Game Gear, Windows, GameCube, PlayStation 2, Wii, Xbox, and arcade cabinets. A version of the game for smartphones and tablets was released in 2013. The Tetris game consists of two types of gameplay: the original version and the Tetris World version. The first version is a puzzle game where a falling piece matches tiles to form vertical, horizontal, and diagonal rows. To achieve this, the game uses a grid layout on the playing field. The tiles are assigned a colour, and pieces fall from the top of the playing field. When a tile touches a piece, they connect and the new piece immediately drops to the playing field. If the piece is not compatible with the current shape, it will not combine with it, and will fall to the bottom of the screen. There are four types of falling pieces: tetrominos, triangles, square blocks, and lines. Tetrominos are the most common piece. They can fit four different shapes, which will grow as the tetromino falls. The first piece to fall is the
