.com/play/10285 ===== throwaway59926 At this point, there is nothing Apple or Amazon can do to protect their business from these apps. So what is stopping the author from downloading and having them on his own device? He just needs to make sure to have root access and he can install applications on his own. ~~~ frandroid Sorry, my comment was downvoted for incorrectness, but you're completely right from a user perspective. People who have rooted their devices can install whatever they want. Opinions of the United 2008 Decisions States Court of Appeals for the Third Circuit 8-19-2008 USA v. Holley Precedential or f3e1b3768c
