Description Introduction to Sustainability (2nd Edition) examines the important field of sustainability and its growing importance in the 21st century. Embracing an ecological approach, the text begins by defining and explaining the term sustainability and then moves on to examine the history of sustainability, its current importance, and its possible future directions. After a chapter that defines sustainability, the text explores five major categories of sustainability: economic, environmental, social, political, and ethical. The authors then introduce 10 principles of sustainability, which are reviewed and explained throughout the text. The principles include: sustainability, ethics, equity, alternatives, economic efficiency, scientific and technological progress, human rights, decision-making, recognition of diversity, and responsibility. A: It should work. You can download the drivers to your computer and use them to program the dongle. Or you can just use the C# function "USB_Open(port, device, baud, data_bits, stop_bits, parity)". It will let you program the dongle without any driver installed. You need the USB-MIDI Serial Interface Driver from Microsoft to use the RealFlight Dongle in Windows XP. To get it you need to go to Device Manager and find a RealFlight Dongle. In my case the output is named "USB_Realfly G4 5" and the input is named "USB_Realfly G5 5". There is also a little program called "Dongle emu" that I used, but it did not work so well for me. I was used to program and fly the G4 5 with the RealFlight Dongle. But with the Dongle Emu I was a bit disappointed. It's not perfect, but it works. Maybe it works for you. Good luck! WordArt WordArt is a feature of Microsoft Word. WordArt can be used in addition to or in lieu of simple text formatting options such as changing font and size. WordArt is not the same as shape objects in Excel, Powerpoint, or Visio. WordArt draws shapes using the ink and line effects. Text Editor The Text Editor is found on the Format menu. It has several tabs and features, including: Text, Paragraph, Table, Picture and Chart.
