AutoCAD History AutoCAD is the world's leading 2D computer-aided design (CAD) software program. AutoCAD is a direct competitor to the popular AutoDesk Revit product. The AutoCAD program was first introduced in 1982 by the Autodesk company as a desktop app running on microcomputers with internal graphics controllers. Before AutoCAD was introduced, most commercial CAD programs ran on mainframe computers or minicomputers, with each CAD operator (user) working at a separate graphics terminal. In December 2002, Autodesk launched AutoCAD Map 3D, which was a 3D CAD application based on topological geometry and used a similar model to the Graphisoft ArchiCAD application. In June 2004, AutoCAD Map 3D was released as a stand-alone product that replaced the earlier topological model that was used for the software. AutoCAD

Q: Apache - SSL combined with HTTPS I have a site that uses HTTPS for the rest of the website, but for some pages I use SSL. I use Apache's VirtualHost directive to set up this: Listen 80 Listen 443 # the normal stuff here ServerName test.mydomain.com ServerAdmin webmaster@localhost DocumentRoot /var/www/test/ Options +Indexes +FollowSymLinks AllowOverride all Order allow,deny allow from all # some other stuff here This works fine. I can access the site via However, I'd like to allow as well. My problem is, when I do, I get a certificate warning in a browser. A: I think this is because the and are both using *:443. So the VirtualHost with *:80 does not see the request with *:443. Try to change the to s I've had a similar problem in the past. In recent years, many studies have been conducted on a high frequency power supply apparatus for supplying power to a high-frequency heating apparatus for heating an object to be processed such as a substrate by using a microwave. There is a high frequency power supply apparatus including a metal housing having an opening, a waveguide housing and a waveguide having an opening and disposed in the opening of the metal housing, a front

Unsanctioned Mods: Extremely high stamina Mod Overview: There are some problems that need to be fixed before the mod can be considered for use on the server. The first one is the fact that the weapon stun works by slowly lowering the HP of the target down to 0. The problem with this is that it's not very obvious that something is happening and the person being stunned will simply start picking up their dropped items, rather than staying down. The second problem is that the stun hits are also at max charge, so the player is
