President Donald Trump appointed James Mattis as his Secretary of Defense less than two weeks ago and the retired general has already accomplished more than any other nominee. In less than 48 hours, Mattis has replaced Obama's war-loved pet hack, Ash Carter, with one of his own. In addition to being an extremely qualified general, Mattis has demonstrated his very real commitment to restricting the U.S. military's role in foreign wars and is almost certain to make the world a much safer place. The only question now is – what more can the president do for his country? The question on everybody's lips was "why?" Mr. Trump had already fired his predecessor's national security advisor, Gen. Michael Flynn, and the military-industrial complex rejoiced. But the president was not done. Mr. Trump had already fired his predecessor's national security advisor, Gen. Michael Flynn, and the military-industrial complex rejoiced. Yet the president still wasn't finished. He was reportedly considering John Bolton, a hawk who is not only an ideologue, but has a proven record of advising presidents to invade and overthrow or destabilize foreign governments. Instead, he chose Rex Tillerson, but an unlikely man. The man who was once the CEO of the state run petroleum corporation, ExxonMobil, is now the Secretary of State. In other words, Tillerson is the man who used human rights violations as leverage to extract billions of dollars from other countries. The man who was once the CEO of the state run petroleum corporation, ExxonMobil, is now the Secretary of State. While this would normally be the post of a diplomat, Tillerson does not have to be a career diplomat to be effective, just as Obama's Secretary of State, John Kerry, was successful even though he never held a diplomatic position. What matters is not the job title of the man but the experience and expertise that comes with it. And that is exactly what Tillerson brings to the table. While Tillerson is right that the military is over-bloated, this is only because the world has become a much more dangerous place over the last two decades, when the U.S. was in "decline" and even worse, the American public largely disagreed. But if this decline is not an opportunity, it
