## HSLAB Print Logger FE Crack + With Registration Code For PC

Print monitoring system, used to collect information about printing jobs (print jobs) from a selected printer. Select printer (printer is local) or define a collection of devices. Jobs are monitored to determine how many pages (total, page-by-page, copying and to specific sheets) were printed, to determine on which page or to which page(s) were printed the job copies (copies), to identify the print job that requested printing (work to print), to identify the person who printed the job (user, printer owner). Monitoring jobs can be performed from within a job's printed pages (when you pass a paper), at the end of the job (a print job can be stopped for printing) or at the end of the print job, including number of copies printed, print quality, collating copies, dithering, multiple copy jobs and so on. The user can define a job report, that will collect print job parameters, its number of pages and number of copies and will be printed at the end of a job. This report includes a table, where all information is available. Job is printed in the background and does not wait until user finishes the job. When the user completes the printing job, the user receives a notification, that tells him that the job has been printed. The Print Logger FE software is included into the package HSLAB. The package includes all the necessary components for you to monitor your printers. You can use HSLAB package to monitor printing activity in your computer. You can: · Monitor your printers: · Monitor a remote printer by a local printer · Monitor a remote printer via a specific user · Monitor a remote printer by a specified computer · Monitor a remote printer via a specified user · Monitor a remote printer by a specified computer · Monitor a remote printer via a specific computer · Monitor a remote printer by a specific computer · Monitor your printers by users: · Monitor a specific user via a remote printer · Monitor a specific user by specifying user name · Monitor a specific user by specifying user name · Monitor your printers by computers: · Monitor a specific computer by a remote printer · Monitor a specific computer by specifying user name · Monitor a specific computer by specifying user name · Monitor your printers by devices: · Monitor a local printer by a remote printer · Monitor a local printer by specifying user name · Monitor a local printer by specifying user name · Monitor your

## HSLAB Print Logger FE Crack+ Activation Code For PC

Macro Name: Value: Description: Print Job Blocked: - Specifies the reason on which the print job has been blocked. Print Job Scheduled: - Specifies that the print job has been scheduled for printing. Duplex Printing: - Specifies that duplex printing is to be used. Paper size: Specifies the size of the paper. Page Scale: Specifies the factor by which the printed output is to be scaled. The apparent page size is scaled from the physical page size by a factor of "Page Scale" /100. For example, a letter-sized page with a "Page Scale" value of 50 would contain as much data as a page of 17- by 22-inches because the output text and graphics would be half their original height and width. Media Type: Specifies the type of media being printed on. Color Printing: Specifies that color printing is to be used. Print Quality: Specifies the printer resolution in dots per inch. Print Processor: Specifies the name of the print processor to be used. Driver: Specifies the name of the printer driver to be used. Horizontal Resolution: Specifies the x-resolution, in dots per inch, of the printer. Duplex Printing: Specifies that duplex printing is to be used. Horizontal Resolution: Specifies the x-resolution, in dots per inch, of the printer. Vertical Resolution: Specifies the y-resolution, in dots per inch, of the printer. Collate Copies: Specifies whether collation should be used when printing multiple copies. Dither Type: Specifies how dithering is to be done. Duplex Printing: Specifies that duplex printing is to be used. Color Printing: Specifies that color printing is to be used. Print Processor: Specifies the name of the print processor to be used. Job Blocked Reason: Specifies the reason on which the print job has been blocked. Print Job Triggered: Specifies that the print job has been triggered for printing. Duplex Printing: Specifies that duplex printing is to be used. Horizontal Resolution: Specifies the x-resolution, in dots per inch, of the printer. Vertical Resolution: Specifies the y-resolution, in dots per inch, of the printer. Dither Type: Specifies how dithering is to be done. Color Id6a3396d6
