Configure & Monitor Hyper-V Servers: • Select the individual virtual machine(s) that you want to monitor • Select the option to specify the CPU, RAM and network • The user will then be able to select the desired option and save • The software will quickly display the actual resource utilization details of the virtual machines • The tool displays a Tree-View, with each of the virtual machines as a node, along with its associated VM name, network name, Disk and Memory details, CPU utilization and network utilization of the specific VM. Configure & Monitor Multiple Hyper-V Servers: • Select the multiple servers that you want to monitor • The user can then select the desired option to configure and monitor servers • In case a server fails, the user can get the diagnostic information of the failed server • The user can also choose to take action and resume the server at later time Tool provides an interactive front end design for configuring Hyper-V Server(s) with a large number of parameters. The user can easily select different options for each of the virtual machine(s) within the Hyper-V, for CPU and RAM. The administrators can select the Boot order for each virtual machine from a predefined list and can take specific action to all or some of the virtual machine(s). The user can also shutdown or power-off the particular virtual machine(s) from the virtual machine menu, which can be further displayed in the Tree-View dashboard view in user-friendly graphical format. The dashboard offers a beautiful Graphical User Interface, with intelligent Tree-View and bar graph views to present the actual resource utilization and CPU utilization details. The graph is helpful to visualize the allocation / consumption of resource by the virtual machine(s) and it also shows how the computer (CPU) is allocated to the virtual machine(s). User has the option to monitor and configure multiple virtual machines using a Tree-View graphical user interface. He can select from a predefined list of Virtual Machine(s), the devices that he wants to monitor. User can select specific options for each Virtual Machine and later on, he can also choose to take actions for specific virtual machine(s). In case of a failure, user can get all the diagnostic details of the failed server along with the information of the action to be taken. User can also choose to configure the virtual machine(s) from a list of devices and later take actions for specific devices. This feature helps in 77a5ca646e

Free HyperV Configuration Tool is an intuitive and easy to use tool for managing Hyper-V Virtual servers. It allows user to get the utilization details of each virtual server including CPU, Memory, Disk and Network utilization as well as to analyze them in a simple and intuitive manner. Using this tool, you can also provision new server or VM in your network. It also has the ability to automatically capture the configuration details like boot sequence, boot order, number of virtual hard disks, NIC's etc. from Hyper-V server. There are multiple uses for this tool. Once you have it running, you can check your physical servers in order to analyze their requirements and to create a VMware image, if required. The free software can be used for remote server monitoring and management. By law, all such groups must publicly disclose all donations they receive. But there is no requirement for candidates to reveal their individual donors. If donors are willing to be named in public, they can have great influence over a candidate's campaign. That's the basic idea behind Americans Elect, a group that hopes to do for presidential candidates what political action committees have done for House and Senate campaigns. Americans Elect, which had a short-lived run in 2008, is releasing publicly available lists of donors, and those donors are expected to make donations to candidates, committees and political parties. Democratic donors have already started contributing, and more than \$2.5 million has been given to date. But Republicans have not, and that is key to understanding the dynamics of the race. Gov. Charlie Crist announced Thursday that he had given \$1,000 to Americans Elect, so it's likely that some other major Republican donors are planning to follow his lead. Major Republican donors do not publicly oppose Americans Elect. They privately wish they could give more, but they are cautious of the way some of the candidates in the race view the group. If Crist throws his weight behind Americans Elect, then other Republicans can see the wisdom of joining in.Q: Customize date range for
