[separator]1.1.2 Model Update: Models can be updated by applying a new set of parameter settings to the model to address a specific customer or production request. In some instances, a model may be updated by reinstalling the model. This can be done by applying a new set of parameter settings, by selecting Application Update | Renew Model, or by reinstalling the model by selecting Application Update | Restore Model. To update a model, an empty or blank drawing must be selected. If you are not sure how to select an empty or blank drawing, refer to the "Select a Drawing" section on page 8-7. 1.2.1 Parameter settings: Parameter settings allow users to change model values. Some applications, such as AutoCAD Architecture, use parameter settings to control aspects of a drawing created from a schematic. In AutoCAD, the user can create a new set of parameter settings by: * Opening the Application menu and selecting Parameter Settings, or by using a shortcut key or context menu command. Parameter settings can be edited and saved with the context menu command. The default name of a saved parameter setting is generated as the last eight characters of the name of the parameter. The user can assign a value to a parameter setting, or delete it. **Figure 1.2A** : The Model Properties Dialog box **Figure 1.2B** : The Parameter Settings window for the last parameter setting To open the Model Properties dialog box, do one of the following: • Select Application Menu | Model Properties or click the Model Properties button on the Command line. • Select the command or shortcut key for the Model Properties dialog box. The Model Properties dialog box is automatically opened when you select a command or shortcut key. **Figure 1.2C** : The Model Properties dialog box 1.2.2 Parameter Settings Gallery: The Parameter Settings window displays a list of available parameter settings. To modify a parameter setting, click the parameter setting to display the Edit Parameter Settings dialog box. **Figure 1.2D** : The Edit Parameter Settings dialog box 1.2.3 Parameter Settings Window: The Edit Parameter Settings dialog box provides the ability to enter the value for a parameter setting, to edit the value, and to delete the parameter setting. **Figure 1.2E** : Entering a value for a parameter 5b5f913d15
