Viral respiratory infections, particularly in children, are still very common. Besides acute viral infections, they cause

complications such as prolonged and repeated infections, hypertrophy of the tonsils and chronic obstructive bronchitis. Furthermore, viral infections are associated with, or responsible for, acute and chronic diseases of the upper respiratory tract, such as the common cold, croup, bronchitis, tonsillitis, sinusitis and pneumonia. This chapter focuses on acute viral infections of the upper respiratory

tract in children, which are defined as infections of the nose, paranasal sinuses and middle ear. Acute viral infections are divided into upper respiratory tract infections (URTIs) and acute pharyngitis/tonsillitis. These are classified according to the assumed causative virus, and the most common viruses are described. Furthermore, minor complications of viral infections, such as croup and bronchiol
