Most Tweetmill reviews Tweetmill Review by Alex Efficient service 10.0 Tweetmill provides a simple and efficient interface to follow your tweets. However, due to the narrow nature of the interface, there are some features that are not available in Tweetmill. I also faced some hiccups while testing out Tweetmill. For example, when I tried to link my Gmail account to Tweetmill, there was no Gmail integration available in Tweetmill. Since Tweetmill was meant to be a minimalist app, it would have been ideal to have a way to import contacts, so that I can import contacts from Google and Skype. But overall, Tweetmill is a great tool to follow your tweets and keep yourself up-to-date with your followers' tweets. Tweetmill Review by Carl A real time messenger 10.0 After years of using Twitter, I've always wanted to have my timeline and messages in my hands and have never been able to find an app that could do so. However, one day I was searching for something to download that could help me do that, and I came across Tweetmill. I was a little hesitant about using it because I've used it and I was overwhelmed by it. Yet, as I spent more time using it, I slowly began to like it. Initially, I used Tweetmill mostly to see who was mentioning me. I soon found myself using it to read my own tweets. Tweetmill has a great way of showing me who is following me and who I follow. Tweetmill is an excellent app for anyone who wants to keep up with what is happening in the world. It is a great way to keep up with the news. Tweetmill Review by Ken Best interface, fastest & with the least bug 10.0
