What's New In WinJukebox?

WinJukebox is a easy to use jukebox application created to replace those software that are used in bars or small restaurants that are stuck with the limitations of other jukebox software. Using WinJukebox, you can control the music from up to 50 jukeboxes that work using a LAN or Internet connection. Although not as powerful as the higher cost alternatives, the numerous playlists and automatic processing means that even the basic model can be a lot of fun to use. WinJukebox allows you to: * search artists, songs, albums, playlists, genres, tags. * add tracks to your collection. * download and add music from the internet. * preview tracks while you add them to your library. * record songs that have been played and add them to your collection. * purchase music from the

internet. * play a song that is added to a playlist. * browse and listen to the contents of a playlist. * browse and listen to a song from the internet. * play a random track when the queue is empty. WinJukebox Features: * create playlists and add songs to them. * switch between playlists. * view the contents of a playlist. * create and edit playlists. * add a single track or a whole album to a playlist. * add a track to a playlist, start a recording session, and stop a recording session. * manage your music collection, and transfer it to other computers or jukeboxes. * browse artists, songs, playlists, genres, tags from your computer's hard disk or from the internet. * search for an artist, song, or any other keyword. * browse the contents of your collection, using a playlist as your navigation tool. * view and manage all recordings on a jukebox. * search for an artist, song, or any other keyword. * you can subscribe to CDs and other music from the internet. * add music from the internet to a music library. * search artists, albums, songs, or any other keyword. * browse artists, albums, songs, playlists, genres, tags, and other keywords. * browse your jukebox or your computer's hard disk. * view the list of updates and other notices in a notification area. * you can edit playlist names, playlists, or the contents of a playlist. * send
