If you don't want to use Photoshop, or if you're just learning how to use your image-editing program, you can check out the rest of the chapters in this book. For more information on commonly used software options, please see the sidebar "Image-editing software," later in this chapter. As stated previously, Photoshop has two basic types of layers: _objects_ and _text_. Objects can be placed on a layer, and on a separate layer you can place text that can be added to or placed over an object, creating various effects. You can change the color and size of text within Photoshop, and you can apply special effects to the text. You can also add an artistic effect like drop shadow, or background the text in a variety of ways. Chapter 3 explains how to use Photoshop's layers in detail. You can create many types of objects and use many kinds of effects. In Chapter 5, we discuss layers, objects, and the various effects available in the toolbox. This chapter explores most of the basic options available in Photoshop. ## Discovering Photoshop's Many Features Before you dive into the meat of the software, it's important to cover some basics about Photoshop's many features and the different types of layers you can create.

Police are investigating after an incident at a Menifee apartment complex Thursday night. Police were called to the 13100 block of Caroll Drive around 10 p.m. when one of the residents reported an intruder had broken into the apartment. The resident told officers that the suspect was wearing a mask and when confronted, the suspect threw a brown plastic trash bag with a knife inside of it over the garage's fence, police said. The burglary victim's roommate told officers he heard glass shattering in the garage and saw the suspect holding a pizza box, but that the suspect fled the scene. No injuries were reported and no one was arrested. Anyone with information about the suspect's identity is asked to contact Menifee police at 951-627-7368 or contact Crime Stoppers at 800-222-TIPS.1. Field of the Invention The present invention generally relates to a laser processing apparatus and a laser processing method, and more particularly, to a technology which can be applied to reduce processing time and increase the efficiency of a pulse emission to achieve appropriate processing. 2. Description of the Related Art Laser processing apparatuses are used for processing a workpiece to be processed by projecting a laser beam in a predetermined shape onto the workpiece (for example, a wafer) placed on a processing table. One example of the laser processing apparatus is disclosed in U.S. Pat. No. 6,741,493. The laser processing apparatus includes a fθ lens (fθ lens) moving toward the direction of an optical axis of a laser beam, and a rotation mirror moving along the direction of the optical axis of the laser beam. When using this laser processing apparatus, it is necessary to prevent the fθ lens and the rotation mirror from interfering with each other during the work of a wafer. For this reason, the laser processing apparatus is provided with a space between the fθ lens and the rotation mirror, and the fθ lens and the rotation mirror are moved along a predetermined path. However, with this configuration, it is very difficult to increase the width of the laser beam so as to make the operation time shorter.
