Take a look at the “Motion Capture Movement:” The result of the HyperMotion Tech engine is a faster, more fluid and responsive game with a brand new set of moves for players to master, including the legendary “duel of the year” and the ability to offload with ease. One-Touch Control lets players control team building, tactical play and execution with the touch of a button. Players can use the One Touch Action Control scheme in three key areas: Precise passing control. Players can control the ball in almost any direction with a flick, a touch or a drop. The One Touch Control scheme is available from the turn of the ball and beyond – to the end of the field, plus all areas in between. Precise dribbling. Players can hold their pass button and use a flick, a touch or a dribble to dodge, block or shoot on the move. Hold the dribble button and a flick will enable you to spin away from an opponent, blocking an opponent with a touch, before finishing with a great shot. Fluid movement and movement control. Players can use the motion control scheme to move freely and enter a sweet spot, as well as to execute a slick dribble. One Touch Control is also available through the Pass, Dribble and Shoot button to give players more control in these key moments. A player can use the Pass button to pass, and use the Dribble button to dribble to a specific area and perform a 1-Touch Dribble. The player can also use the Shoot button to shoot from any position.
