A: According to the Python Standard Library documentation, the error indicates that the file you are trying to open is invalid: The ErrorDialog constructor raises an exception if f_name is not a valid path-like object or f_name points to a directory object. It seems that your.tsz file is not valid, because it is actually a directory. Just try to specify the full path when calling the open function: os.path.join(snaglmg, '*.tsz') Q: Sensible & Practical software design and implementation for a person to create a game (on a emulator)? As I've recently become interested in game development and programming, I was wondering if anyone could suggest any recommended resources or write-up useful resources for a person that has little to no experience in game programming to attempt to program their own games? Specifically, I would like a write-up or article to cover the initial concepts for what I need to do and what I need to know to begin and come up to par in game development, especially as it relates to game programming and coding (Java & C++) for a person to then be able to create their own game through their own game engine. I would really appreciate any input, please reply with any resources, links, documentation, writing up etc... A: If you mean developing a game on your own in game development time with your own source code, then this is most likely not going to be practical, because for a beginner, it is not reasonable to write the source code for all game logic (for a first attempt at least), and you also won't have a library of game-programming high-level functions and methods that you can use
