This is a real time tactical game, meaning players will direct their characters by tapping along the edges of the screen to select their moves. From strong to weak, attack to defend and build, the basic game involves tapping to move any character within range and destroy all opponents by collecting cards that are shown on the screen, creating a tactical dynamic in which stronger creatures can be destroyed more easily. Clash Royale will include 85 cards at launch, which can be added and collected to a players' deck. Each card will have a unique card value based on strength, defending, attacking, or special effects. It has similarities to the tactics and strategy of other popular games, but its unique game play allows players to build their own deck and add powerful cards." With a focus on high quality and high entertainment, Clash Royale is sure to find an avid following. More information about Clash Royale and future plans
