FIFA is the most popular foot ball video game ever produced. It came about in the early 80s as a way to attract a younger audience. The first FIFA was so cool and different people thought it came from the future. Technology improved a lot in the early 80s and people wanted to play football games. The best technology was coming from the US and there were more and more companies making football games. Electronic Arts decided to make their own football game that had great graphics and a simulation like real football. The first game was released in 1985 and it became a huge hit. FIFA was a game that everyone could understand right away. Everyone had played arcade games in the 80s and that is what came to mind when playing FIFA. Everyone could see that players were going to perform by running down the right pass and shooting at the goalie's head. It was easy to play and be able to play football. Everything was designed well and players could express themselves on the field. The popularity of FIFA grew over the years. It is now the most popular game in the world and one of the most played video games of all time. A lot of other games are released each year by different companies but FIFA has been the most popular and influential game for this type of game for over 25 years now. FIFA 20 will be the 20th entry of the video game series and will be released in the fall of 2019. It is the 2nd game in the series to be made by Electronic Arts. This means that FIFA has been doing well for nearly 2 decades and has nothing to be ashamed about. It's one of the most popular games on the planet and it does not have a tiny market share. To put that into perspective, the current FIFA is the best selling game in the entire world. It is bigger than the Madden, NBA, and NHL franchises combined. The Properties of FIFA Over the past 25 years a lot of developers have made FIFA games that have all been successful. The design principles and gameplay features that have been added to FIFA have helped to make it into a great game. When looking at these principles one thing stands out. The developers have always made it so everyone can play FIFA. That is why it has become so popular and why it is still around even though other games have come around. It plays great for everyone and that makes it the best game in the entire world. FIFA uses its own bc9d6d6daa
