The diagnosis system, the display output includes a checklist for various issues ranging from normal to major problems. The system consists of the following categories Computer, Display, Buttons, Security, and Service History. The system can also be used to start Xentry, communicate with this system and to start any program on your computer. Xentry Diagnosis that is a good demonstration of the technical complexity of the vehicle is one of the main features of the system, and the principle of an overview of all Xentry diagnostic systems and the system checks the engine, gearbox and related components to determine the state of the BlueTEC system, including how well AdBlue filter system has been used. The system uses sensors on the vehicle and calculates the number of hours or

miles the vehicle has been driven. If the data are constantly updated, then the system can warn you when it's time to take a vehicle to an authorized repair facility. You need to wait for your files to be downloaded. After the previous operations, you can select a place to save downloaded files from several options, such as «Download». Click the button, and you will be allowed to download your files to the specified location. If you get stuck during the installation process you can try to open the program and then select a «read-only» option to deactivate the automatic wizard, which should help you to continue the process. If the utility is not able to correctly download several files, you can try to manually extract all necessary files, using a manual installation.
