
FSX BRAZIL Mega Pack SCENERY !!LINK!!

very often, your scenery addons include beautiful towns and cities, but have very empty exterior areas, which we all know can be an issue. this causes people to fly to the airport which we all know is bad since we lose time and money. so if your scenery addons can show you the empty areas such as the terrain outside of the cities, and populate them with the cities, you have a massive advantage. the 3d objects are some of the best i have seen in the whole fsx series, this being my fourth version. the objects in this add on have detailed textures and in some parts even 3d model elements that mimic the photo realism of the city. therefore this scenery really has some of the best scenery that the residents of brazil have a chance to see on a regular basis. i absolutely loved the scenery, it was very well researched and came with a powerful pro view. it is my favorite city scenery in the whole of x-plane and for the most part i feel that it should be one of your favourites as well since you will have a chance to land in the city, fly around and to the airport and to the city at which you will be touching down in this product. overall, i would say that paulistano is one of the nicest locations available for x-plane. it would take a long time to give even a glimpse of this scenery for one of the many reasons why the scenery is great. this is one of the few cities in the world that really captures the element of true brazil and its people. so if you have not been to brazil, you can imagine that its very diverse, and this scenery is a good example of that.

FSX BRAZIL Mega Pack SCENERY

i'll start by saying that the scenery was 3d load tested by ryan mercer who is a consultant at flightgear, a flight simulator free and opensource software which was used to create this scenery. in fact it was flightgear that was used to export fsx's scenery to x-plane 11 and this scenery was the result of one of the later flights tests at flightgear. if you like big cities then it's the place to be. this is probably the best looking big city scenery pack for fsx i have seen that really brings to life an object that is so much of a part of the culture, its people and life of brazil. the choice of terrain is attractive and can be flown. you can even fly in the sao paulo suburbs to a gso (grunow air services) airport in guarulhos which is in the south of the city. after speaking to ryan mercer and going through the 3d load tests and the real world photos that he has i must say he is very good at creating realistic cityscapes with the fsx brazil mega pack and i am delighted with how the scenery was presented for the public and especially the community of simmers. the fsx brazil mega pack

v4 is in the process of being submitted to microsoft and once it goes official then it will be able to be pre-ordered from his website. if you're a flight simulator fan then you know that we like to do a lot of updates for our scenery packages and after creating a new one in x-plane it is always a good to move it into a new branch to test and refine it to make it the best it can be. as for the airport, as you can imagine, i made a special effort in the graphical user interface in order to make the best possible impression for this scenery addon. the wide airports approach, and the ambience fit perfectly to the theme of the addon and the logo of the ministry of civil aviation of brazilian, so this is the type of scenery that conveys the impression of the reality of a work of art in a realistic and simple way. that is why, i spent a lot of time in the graphical interface, but even in that, it was very difficult to choose the colors that best match with all the lights and the characteristics of the 3d scenes, as well as using the materials that perfectly match for each scene of the addon. 5ec8ef588b
